New Year, New Annual Report!

The NABCOP project team are currently drafting the audit's third (2019) Annual Report.

Therefore, we would like to ask you to review the 2017 and 2018 Reports and Tables.

www.nabcop.org.uk/reports/

Specifically:

- Has your information been accurately captured under the correct Trust?
- Was the information provided on your Trust in the 2016/17 organisational survey correct?

We are also making plans for our 4th year of work. This will include a second Organisational Audit (as conducted in 2016/17).

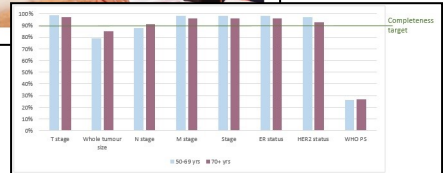

- What additional topics should we seek to report on in the coming years?

Please contact us if you have a suggestion about what aspects of care for older patients the Audit could provide information on in the coming years.

National Audit of Breast Cancer in Older Patients
Part of the National Clinical Audit Patient Outcomes Programme
2017 Annual Report

National Audit of Breast Cancer in Older Patients
Part of the National Clinical Audit Patient Outcomes Programme
2018 Annual Report
Results of the Prospective Audit in England and Wales diagnosed between January 2014 and December 2017

Fitness assessment form – we need your feedback

We thank the breast cancer units that volunteered to pilot a fitness assessment for older patients in breast clinics, in late 2018.

The pilot aimed to investigate whether this simple tool could be used to assess the health and fitness of older patients within a breast unit as part of routine clinical practice.

More information, including the staff and patient information leaflet, is available at:

<https://www.nabcop.org.uk/resources/fitness-assessment-tool/>

Please contact us if you were not able to participate in the 2018 pilot, but would like to provide us with feedback on our fitness assessment for older patients in breast clinic.

On behalf of the NABCOP Project Team
